East Montpelier, Vermont · Open to Remote Roles

SUMMARY

Technical Lead with 7 years of engineering experience driving digital transformation in fintech and enterprise environments. Delivered systems processing more than \$10 billion in transactions annually across 45+ international markets, improved SDK performance by 20%, and accelerated team velocity by 30%. Led distributed, cross-functional teams, architecting and building scalable applications using TypeScript, React, and Vue.js, with proven success mentoring engineers and implementing modern CI/CD practices that accelerate product delivery.

EXPERIENCE

Mastercard

Technical Lead Dec 2024 – Present

- Led cross-functional team of 13 engineers building Mastercard's next-generation checkout application, successfully launching across 45+ international markets
- Architected and delivered production-grade React and Vue.js applications serving high-traffic retailers including Amazon, AliPay, Costco, and Shein
- Engineered SDK enabling AI agents to execute secure payments on behalf of users, using encrypted SD-JWTs to cryptographically bind user consent to each transaction
- Piloted GitHub Copilot integration across team workflows, increasing feature development velocity by 15%

Senior Software Engineer Mar 2021 – Dec 2024

- Spearheaded end-to-end development of Mastercard's Unified Checkout SDK and web component library, enabling integrators to embed checkout into their own storefronts
- Led development for globally-deployed SDK now processing more than \$10 billion in transactions annually
- Improved SDK performance by 20% by implementing asynchronous initialization and code chunking patterns for Mastercard's Unified Checkout SDK, enhancing user experience for millions of transactions
- Increased checkout conversion rates by 4% through data-driven UX optimizations and frontend performance enhancements, directly impacting millions in transaction volume
- Accelerated team velocity by 30% through systematic mentoring of engineers and implementing regular pair programming and knowledge-sharing sessions

Flatiron School

Software Engineer / Curriculum Manager Apr 2019 – Mar 2021

- Led the engineering team maintaining Flatiron's open-source full-stack curriculum covering Ruby on Rails, JavaScript, and React, serving 3,000+ students globally
- Developed automated tooling and Ruby gems for large-scale content management, reducing manual curriculum updates by 60% and improving consistency across 20+ course modules
- Implemented feedback and progress monitoring systems on Flatiron's Learn platform, improving student engagement and on-pace completion rates

EDUCATION

Flatiron School · Software Engineering Bootcamp

Hunter College, CUNY · Bachelor of Arts, English Literature

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Ruby

Frameworks: React, Vue, Rails, Node.js

Tools & Skills: Frontend Development, UI Engineering, SaaS, Technical Architecture, Agile, Scrum, Microfrontends, REST APIs, Accessibility (WCAG), Git, Jira, Confluence, Figma, Storybook, Jenkins, CI/CD, Docker, Webpack, Vite, Rollup, TDD, BDD, Jest, Vitest, Cypress, Playwright, AWS, GitHub Copilot
