211 Banfield Road, East Montpelier, VT 05651

SUMMARY

Dedicated Senior Software Engineer with 5+ years of experience designing and developing scalable web and mobile solutions. Proficient in technical architecture and design documentation, developing and launching applications, and leading teams in an Agile environment.

EXPERIENCE

Mastercard

Remote

Senior Software Engineer / Service Architect

March 2023 – Present

- Led a team of five engineers on development and deployment of a critical Vue + TypeScript application, preventing disruptions from a third-party dependency update
- Designed and prototyped Mastercard's latest online checkout products, working in close collaboration with product and engineering leadership from conceptualization to pilot to full product launch
- Coordinated high-level discussions with Mastercard leadership on project roadmaps and risk assessments
- Created technical designs of complex solutions for Mastercard's ecosystem of online checkout products
- Wrote external API contracts for business partners and public documentation for Mastercard's products
- Mentored and supported peers in troubleshooting and feature development through regular pairing sessions, leading to a more resilient and independent team
- Facilitated team and scrum ceremonies, reviewing, approving, and deploying PRs in two week sprints

Senior Software Engineer

March 2021 – March 2023

- Delivered high-quality, thoroughly tested TypeScript code for Mastercard's online checkout products, contributing to the team's flawless performance with zero production defects for over a year
- Collaborated with front end, back end, security, and product teams on product and feature launches
- Updated and maintained Jenkins deployment pipelines, improving continuous integration practices
- Played a key role in the development and successful launch of Mastercard's Unified Checkout Solutions, a JavaScript SDK now operational in 35 countries, processing millions of online transactions
- Improved UCS initialization time by 10-20% through optimized asynchronous code parallelization

Flatiron School

Remote

Software Engineer / Curriculum Manager

April 2019 – March 2021

- Led a team of engineers, writers, and teachers maintaining Flatiron's open-source full-stack curriculum on Ruby, Rails, JavaScript, and React
- Created tooling for large-scale repository maintenance and Ruby gems for bulk content management

EDUCATION

Flatiron School | Software Engineering Bootcamp

Hunter College | Bachelor of Arts in English Literature
